

Challenge 2.2

```
1 class Player:
2     def play(self):
3         print("The player is playing
4         cricket.")
5 class Batsman(Player):
6     def play(self):
7         print("The batsman is
8         batting.")
9 class Bowler(Player):
10    def play(self):
11        print("The bowler is
12        bowling.")
13    # Create objects of Batsman and
14    # Bowler classes
15    batsman = Batsman()
16    bowler = Bowler()
17    # Call the play() method for each
18    # object
19    batsman.play()
20    bowler.play()
```
